

**MODEL: PDG-390SC** 

INDUSTRIAL SERIES

# **Powercity**

" 26 Years of Generator Experience

SOUNDPROOF & WEATHERPROOF AC DIESEL GENERATORS

# MODEL : PDG-390SC

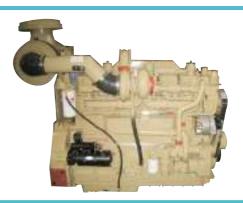

- Compact designed soundproof and weatherproof canopy.
- All canopy parts are designed with modular principles.
- Detachable designed doors provide most accessible for maintenance and repairs.
- All metal canopy parts are factory rustproof using special powder paint coating.
- Single point lifting eye designed for easy mobilization.
- Transparent glass control panel viewing window.
- Optimized ventilation design provides better generator cooling.
- Provision for external fuel tank for extended operation through fuel intake & return valves.

#### Premium performance

- Solid NT-Series engines have been service proven through millions of hours of operation in some of the world's most demanding applications.
- The 14 litre, six-cylinder NT855 has been engineered to handle higher injection pressures, withredesigned overhead arrangement, pistons, crankshaft and camshaft. A gear train with high contact ratio spur gears also eliminates unwanted thrust loads and reduces noise.
- Like the rest of the NT family, the NT855 delivers wide-ranging benefits including fuel efficiency, low oil consumption, reliable long life, high power and durability.

- Over-rated, brushless, rotating exciter with solid state AVR.
- Class H winding insulations provide high temperature resistance.
- Standard degree of protection IP21.
- Self exciting and self regulating.
- Factory impregnated epoxy varnished.
- · Heavy duty steel frame cast-iron cover.
- · Stator grease insulation covered.
- Flywheel location cooling fan.
- The PLC Generator set controller uses micro-processing intelligent and network technique which can carry out precision measure, constant value adjustment, timing and threshold setting and etc. of multiple digital parameters.
- Carry out functions including automatic start/stop, data measure, alarms indicates service affecting faults, and compatible with most standard ATS.
- Uses LCD display, optional Chinese and English display with easy operation, reliable and durable.
- Parameters can be set in site or in monitor center & can not lose even power off.
- Easy to replace with a plug-in type socket at the back of the control module and low cost to the end user.
- Automatic shutdown on fault conditions such us high temp, low oil pressure, over & under speed (RPM), over load & low fuel stock level.
- Another set of analog gauges for engine status monitoring including un-resetable run hours gauges to prevent tampering.
- Provide Volt-adjust knob, RPM adjustment knob, Manual parallel switch and synchronizing lamps.

#### ALTERNATOR

Make & Model		POWERCITY MWL36E			
Frequency	Hz	50 60			
Output Rating (KVA)	Continuous	330	394		
	Standby	344	437		
No. of Phases		3-Phase (4 Wires)			
Rated Voltage	V	200~240 / 380~440			
Power Factor		0.8 (Lagging)			
Voltage Regulation	%	Within +/- 1.5			
Excitation		Brushless, Rotating Exciter (with A.V.R.)			
nsulation		Class H			

#### ENGINE

Make & Model		Cummins NTA855-G3B	
Туре		Vertical Inline, Water-cooled, 4-Stroke Direct Injected, Turbo intercoller, Air intrcooler	
Output Rating	Kw/rpm	361/1500	391/1800
No. of Cylinders-Bore x Stroke	mm	6 - 140 x 152	
Piston Displacement	L	14L	
Fuel		ASTM No.2 Diesel Fuel or Equivalent	
Fuel Consumption @75% load	L/h	46	50.9
Lube Oil Capacity	L	30.6	
Coolant Capacity	L	48	
Battery Capacity	V-Ah	12V-150Ah (2pcs)	
Fuel Tank Capacity	L	370

Fax: +63(2) 829-9985

Continuous running at variable load for duration of an emergency. No overload is permitted on these ratings.

Continuous running at variable load for unlimited periods with 10% overload available for 1 hour in any 12 hour period.

STANDBY:

# **About Powercity**

Powercity Corporation was established in 1993. It engaged in the selling, leasing, and distribution of diesel- and gasoline powered generators as well as electrical supplies.

The company was conceived by a man who has more than two decades of experience in the operation, maintenance, and service of engine-driven power generators made by leading brands in the market. These decades of field experience have resulted in the high-level of generator expertise needed to produce safe, user-friendly, cost-efficient, and dependable generators.

It started its business growth by providing generator repair and maintenance services in cell sites of a local mobile operator Smart Communications in 1996. Because of the company's outstanding performance Powercity gained recognition from Smart Communications and also gained opportunity from its rival Globe Telecom in the year 2000.

In 2002, the company established its own diesel generator manufacturing plant in China known as Powercity Electromechanical and Equipment Co. Ltd. The latter, investing in research, development and manufacture of Powercity generators, load banks, automatic transfer switches (ATS), electrical conduits, accessories, unistrut channel, clamps and dc fan ventilation. At present, Powercity delivers its products to the Middle East, Africa, Australia, and Southeast Asia including Philippines.

As the company maintained its good business relationship and reputation with Smart and Globe Telecom, Powercity gained another opportunity in Sun Cellular in 2005 in terms of sales and after sales service of Powercity generators.

POWERCITY CORPORATION has been serving other customers for the supply, installation and maintenance of generators and relevant products for the Philippine clients such as Luzon Hydro Corporation, Alcatel Philippines, Nextel Communications, Northern Telecoms, Lucent Technologies, Hutama Skyway Project and more.

Today, POWERCITY CORPORATION diversifies into marine engines, renewable energy and telecommunication products to bring an options to its potential customers.
