

FUEL POLISHER

A 3-in-1 Diesel Fuel Polisher System that efficiently removes water and bacterial growth from diesel fuel reducing the possibility of engine or fuel system damage.

The Polisher is equipped with a Bigger Filter fuel/water separator that cleans diesel by circulating and filtering the fuel. This prevents maintenance problems and makes sure your systems are kept ready for emergency situations and daily operations.

- Compact and detachable design for easy installation and maintenance
- Automatic operation at a setting period by PLC controller
- Can run unattended
- Has safety shutdown, alarms for filter and water and maintenance alerts
- Removes 99.9% water and 99% bacterial growth detrimental to pumps and injectors
- For tanks up to 10,000 gallons

Applications

Fleet Maintenance

Large Capacity Cleaning

Boatyards

Fuel Polishing Services

Backup Power Maintenance

Field Maintenance

Above/Below Ground Tanks

Farm Equipment

Equipment Belly Tanks

Fuel Dispensing

3-in-1 Fuel Polisher

- 1** Polish the storage tank
Fuel stored more than 3 months begins to degrade
- 2** Polish when dispensing
Transfer clean fuel when delivering from unreliable sources
- 3** Polish the engine tank
Equipment is ready when unused for a period of time

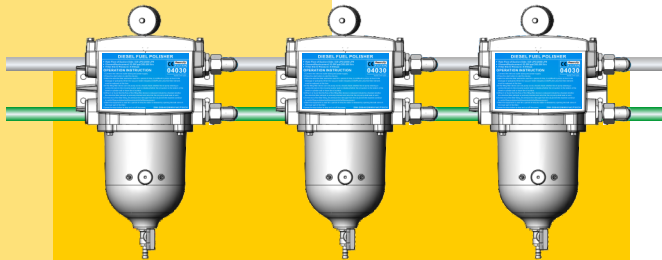

Powercity

Manufactured by:
Powercity Electromechanical & Equipment Co., Ltd
Office & Plant #1: Laicuo Industrial Zone, Xiyuan Side, Jinjiang, China
Plant #2: No. 10 Tiezao Road, Quanzhou Export Processing Zone, Fujian, China

Powercity Fuel & Water

Basic Features

- Hose-DN25 suction and discharge
- Powercity Fuel water separator PFP-2000
- 30 micron paper element
- PLC Controller with configurable timer & pumping capacity
- LCD indicators for element replacement and backflushing
- Drip pan - easy to remove for cleaning
- Vacuum gauge
- Safety shutdown and alarm for clogged filter and water
- Truck skids
- Hose hanger
- Strainer valve on suction side

Optional Features

- Manual nozzle
- Flow meter
- Variable length pickup/discharge tube
- 60 micron stainless steel element
- 10 micron paper element

Flow Rate	PFP-2000x3pcs parallel, 1621GPH/6000LPH	
Customized Voltage and Frequency	110-127V or 220-277V and 50Hz or 60Hz	
W.Draw	750w	
Pump Type	Vane	
Self -Priming	16.75ft/5m	
Dimensions	Width	55.1"/1410mm
	Height	11.8"/300mm
	Depth	19.6"/500mm
Weight	210 lbs/95.2kg	

PFP-2000 From Powercity

The Diesel Fuel Service Cart features the PFP-2000. The Powercity patented filtration is achieved by 5 separate stages to remove water and particulate from diesel fuel. The end result is clean, reliable fuel delivered to the engine or storage tank.

- Small filter size keeps the cart lightweight in comparison to competitor brands with the same flow rate
- Separates most debris and large particles before they reach the element, thereby extending element life
- Backflush capability reduces frequency of element replacements
- Metal filter housing and bowl
- Water level contacts
